

## the only one here

sit down, let me explain this, to those who think they know  
livin' the single guy life is the only way to go  
so many ask, you lonely? I tell them it's all right  
I'm the only one to blame if I don't turn out the light  
finding Sunday's papers still strewn across the floor  
when I'm comin' home on Wednesday with a handful more  
i find the fridge is empty, only beer is on the shelf  
there is no one else to blame for it, only myself

I'm happy & I'm healthy & I love it this way  
when my friends call on the phone they know just what to say  
my message never changes and it won't bring a tear  
"get the tone leave your message I'm the only one here"

the couch was from my aunt, the kitchen table was from Joe  
bedroom stuff is from Ikea, that's required don't ya know?  
fridge belonged to grandma, tools I took from dad  
pots and pans came from my ma, the ugly set she had  
I don't plan on goin' anywhere, lots of fast food near  
the pub that's 'round the block they serve a wicked beer  
it's the only kind of life that I would recommend  
'cause livin' with somebody's gonna get you end

I'm happy & I'm healthy & I love it this way  
when my friends call on the phone they know just what to say  
my message never changes and it won't bring a tear  
"get the tone leave your message I'm the only one here"

there's good and bad in everything, nothing different about this  
worst part is the shopping, I always forget the list  
I'm the last one to have touched it, finding it or not  
I always have to water plants, or toss out the whole pot  
never worried 'bout where I'm goin', I always have my time  
the ladies love my home cooked meals, red candles and white wine  
when I say this, yeah I mean it, I could never take a wife  
'cause all it would ever do is take away my single life

I'm happy & I'm healthy & I love it this way  
when my friends call on the phone they know just what to say  
my message never changes and it won't bring a tear  
"get the tone leave your message I'm the only one here"
